Election/Restriction

I. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6, drawn to a method of maintaining application program configurations on a plurality of network server, classified in class 709, subclass 203.

II. Claims 7-10, drawn to a method of synchronizing configurations parameters on a server with a database of stored configuration parameter, classified in class 707, subclass 8.

III. Claim 11, drawn to a method of managing network servers, classified in class 709, subclass 224.

II The inventions are distinct, each from the other because of the following reasons Inventions I,II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for configuring application programs on servers according to customer desire to match server configuration with customer desires, invention II has separate utility such as a method for synchronizing configurations parameters on a server with a database by automatically updating the configuration parameters on the server in response to the database update , invention III has separate utility such as a method for managing network servers wherein a daemon is triggered by database updates and the daemon retrieves the configuration parameters and updates the server.

See MPEP. § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the
